

Appalachian Trail – Bridge Update Form – Version 2.0

The critical information collected in this form will be used to update the Appalachian Trail Inventory of FMSS Locations and Features.

- FMSS Locations are unique segments, sites, or areas, such as AT treadway sections, designated campsites, privies, shelters, parking areas, substantial trail bridges, and scenic vistas.
- FMSS Features are “assets,” such as stairs, handrails, and signs.

Please check the appropriate update box and fill out the relevant sections below, so that we may accurately document the updates in our system. Remember, if a project added and removed *the same FMSS Feature type* (i.e. *added 10 signs and removed 2*), you should check the “Added Bridge Feature” update box and enter “8 signs.”

IMPORTANT: Only check one box per form. If you have performed the same action (added OR removed) on more than one FMSS Feature Type (i.e. *add Signs AND Handrails*) you can use the same form. However, if you add AND remove multiple FMSS Locations or Features types in one project (i.e. *add a Sign AND remove a Handrail*) you will need to fill out more than one update form. Please refer to the end of this form for complete contact information and where to send the completed form.

Once you have completed this form, please save it as (Club Acronym) Bridge Update Form (Date);
