Stay Safe: Downed Trees pt. 2

- **Look up at least a tree-length away before picking your campsite or taking a break - don't stop where there are dead or damaged standing trees.**
- **Start looking for a campsite early - it may be hard to find one due to fallen trees and debris.**
- **Practice Leave No Trace camping while staying safe:**
 - **Stick to designated overnight sites - these will be easier to find.**
 - **If you dispersed camp where allowed, opt to stay closer the Trail vs. going out of sight and risk getting lost.**
